

Policy 711.03: Transportation (Activities)

Status: ADOPTED

Original Adopted Date: 03/01/1979 | **Last Revised Date:** 05/01/2022 | **Last Reviewed Date:** 05/01/2022

For any approved educational or activity trip, the school will furnish a bus and driver, unless the distance or time of the trip, or the minimum number of students involved make it inadvisable to use a bus. In this case, passenger vehicles, with certified staff members or adult volunteers driving as approved by the administration, may be used.

There are some educational activities for high school students in which students are allowed to drive and/or ride with other students. This requires Principal approval and a waiver signed by the student's parent.

Pupils participating in extracurricular activities shall ride to and from the activity in school vehicles provided. Exceptions will be made for parents requesting other travel arrangements for the return trip to DC-G and may be made for parents to transport their child to the event. Administrative regulations will be outlined in the student handbook.
