

Curriculum Department Resource

Purchasing and the Budgeting Process

Dallas Center-Grimes Community School District

Goal/Aim: To review and select high-quality instructional materials that meet the needs of all our K-12 students and teachers while doing so in a fiscally responsible manner.

Purchasing Considerations	In Depth Look	Curriculum Example
<i>This hierarchical list represents the considerations that are made as part of a successful curriculum purchasing process.</i>	<i>This list represents, specifically, the factors that are a part of each purchasing consideration.</i>	Social Studies (K-12), Counseling (K-12) Est. Total Cost: \$ 770,000
Annual Renewals (Online Supports)	Online solutions are a critical part of resources and cover C, I, and A needs.	If 7 years of online resources (in any content) cannot be purchased, then shorter year purchases take money for renewal costs.
Professional Development Training	Training centered on implementation of the curriculum.	It is imperative that professional development training be provided to help train teachers in the use of the curriculum resources. This is costly as it involves bringing trainers to the district.
New Courses (Future Planning)	New Courses in Content Area (mostly in grades 7-12)	New courses may be added outside of the "adoption" year to meet a programming need and materials must be purchased to support the teacher and/or the course curriculum.
Resource Components	<u>Program Materials</u> Print Materials (Non-Consumable) Digital Materials (Online Components) Workbooks (Consumable) Supplies/Manipulatives (Consumable) Printing Costs (Both C and NC)	Curriculum purchases must include: • Hands-on Materials, Manipulatives, Early Childhood Materials (K-1) • Online curriculum resources and/or Digital Platforms (per student user) • Individual student workbooks/guides • Materials, Posters, Primary/Secondary Resources • Classroom sets of textbooks
Enrollment Considerations	Current Enrollment and Future Growth	Purchase for existing sections with anticipated growth...but must also pick up new sections as they occur and at a non-discounted rate.
Student Services Program	Student Services Programs SpEd (Lvls. I, II, III), EL, and TAG	SpEd – Materials differentiated by Level (I, II, III) EL – Materials at differentiated levels w/ vocab. TAG – Materials to help enrich students.
Elementary and Secondary	Grade level (K-8) then Multiple Courses (9-12)	Elementary – organized by homeroom class. Secondary – organized by course. Secondary has multiple courses per content area.
Core, Supplemental, and Intensive Instruction	Tier I – Core Instruction Tier II – Supplemental Tier III - Intensive	Instructional materials differ by Tier and, in some cases, are created by different vendors. This will help us to close the gap for students.
Instructional Settings	Whole Group, Small Group, Individual	Examples include purchase of various instructional materials (book sets, Shared Reading books, intervention materials, adaptive materials) for use in instruction in a variety of instructional settings.
Best Practices in Curriculum, Instruction, and Assessment (CIA)	Guaranteed and Viable Curriculum Engagement	• Students at each building across the district have access to the same materials. • Reflects strategies for student engagement. • Reflects the diversity of our student body.
District Curriculum Commitments and Expectations	Providing resources to all staff and reducing the burden for teacher purchases	• Materials for <u>each</u> teacher / classroom. • Shared teachers have materials at buildings. • Reflects needed program components. • Reduces teacher burden for planning.
