Re: **DCG High School & Operations Center Projects**
Geotechnical Services
Award Recommendation

Dear Scott:

On the school district's behalf DCI Group has obtained proposals for professional services related to the geotechnical engineering work needed at both the High School and Operations Center projects. After reviewing all proposals in collaboration with OPN Architects, DCI Group would recommend that the services be awarded to Allender Butzke Engineers Inc. (ABE) provides the most economical proposal and also has the added value of being the school district's consultant on past projects.

Once the School Board conducts its meeting on the matter of awarding the services DCI Group will notify Allender Butzke Engineers Inc. and prepare the Owner/Consultant agreement. Please notify DCI Group of the School Board's decision.

Attached is a summary of who DCI Group contacted for proposals.

Please call if you have any questions.

Sincerely,

A handwritten signature in blue ink, appearing to read 'NB', is positioned above the printed name of the sender.

Nick Bruck
Project Executive
