May 2026

TECHNOLOGY: Cost/Benefit

Sorry to keep focusing on technology in my Board Reports, but the district invested a significant amount of money into technology for our school buses and families. It is important to me that you know we are committed to maximizing the value of that investment.

Rather than limiting the pilot program to just a few routes, we opened participation to any school bus driver who wanted to participate, and nearly all chose to do so. Some were understandably hesitant about learning new technology at first — I suspect a few VCRs at home may still be blinking “12:00.” However, once the initial anxiety and frustration passed, drivers have largely embraced the system and recognized its benefits.

We committed to this technology for three years, at which point we will evaluate whether the benefits justify the ongoing cost. The value of this technology has already moved beyond the “cool” factor. To justify the investment long term, it must continue to provide measurable benefits to both the district and our families.

INNOVATION: Technology Upgrade Update

Implementation Updates: We are way ahead of schedule with our testing of the Stopfinder software. Parents are doing a good job identifying “issues” that we needed to address. The issues are mainly related to some navigation issues that needed to be addressed within the individual routes.

- ☒ ~~March~~ Tablets and hardware mounted in school buses.
- ☒ ~~May~~ 90% of drivers are actively using the Wayfinder.
- ☒ ~~April~~ 160 students identified for pilot testing
- ☒ ~~May 10~~ 100 families have subscribed with Stopfinder
- ☒ ~~May~~ Stopfinder app rollout to pilot families
- ☐ Ongoing staff training support
- ☐ July - Introduction Promotion
- ☐ 1st day of school - Issued bus passes to students
- ☐ 90% parent adoption of the Stopfinder by Thanksgiving

Thanks for your support!
