

DCG Core Values	What's happening at Oak View
Collaborative <i>Building a culture of teamwork and shared purpose to achieve our goals.</i>	Teachers are finishing up quarter 3. Our exploratory classes are finishing up their projects, students are preparing for the end of their time in those classes, and are gearing up for new exploratories to finish out the year. Core classes are working through their units of study. 8th grade science is working through their March Mammal Madness brackets. Students and staff are really excited for this unique opportunity to come together (and learn about new mammals). We are gearing up for ISASP by prepping staff with training and students with practice tests and conversations in core classes around testing.
Passionate <i>Championing the success, well-being, and growth of every student with unwavering commitment.</i>	We have gathered student feedback on what is great about Oak View, what could be made better, and who their trusted adult is. We will use this information to continuously improve our school. We gathered similar feedback in the fall, so this will be helpful to see how our efforts are impacting students.
Innovative <i>Embracing creativity to meet diverse needs and challenges.</i>	Many teachers are finding fun and unique ways to incorporate technology into their lessons and assessments. Students have enjoyed the gamified reviews that they see on Gimkit, Blooket, Kahoot, etc. Advisory teachers are supporting students this year through developing their understanding of navigating Infinite Campus as a tool to advocate for themselves (or their grades), and as a communication tool for students with their parents/guardians.

Oak View

Inclusive

Creating a community where every student feels valued, respected, and empowered.

We asked our students to complete a student feedback form. On this form, we asked who their trusted adults are. From this, we identified the students who do not have a trusted adult and then we will have their advisory teacher complete a 2x10 intervention with these students. This intervention is powerful, because the teacher will find intentional connections with the student(s) for 2 minutes a day, for 10 days. This evidence based practice is a high leverage strategy to help students begin to develop deeper, more meaningful relationships with the adults involved. At this point in the year, we have 92% of our 8th grade students and 95% of our 7th grade students who have identified a trusted adult in the building at some point during this school year.

On the feedback form, we also asked students what clubs they would like to see at Oak View. We will be using those suggestions to plan for our last round of clubs for the year. We are in the process of getting fishing equipment so we can add a fishing club, and a ping pong club. We have found so much value in our students' voices.

Supportive

Ensuring every student has the academic, social, and emotional support they need to prepare for their future.

Our PLCs have been working on using common formative assessment data to intervene and support students who have not demonstrated proficiency on the skill assessed.

Our building focus this year has been on DuFour's 4 questions, specifically on questions 3 and 4:

1. What do we want students to know?
2. How will we know they have learned it?
3. What will we do if they have not learned it?
4. What will we do if they have already learned it?
